[Adding Tabs to a page](#)

1. Plugin information

Plugin Name	Tabs
Dependencies	none
Source	Red Balloon
Written for Version	1.0.1

2. Plugin description

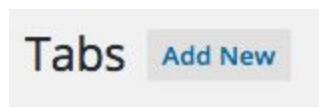

A plugin for adding tabbed content to pages.

3. Adding tabs

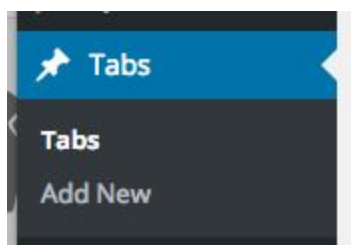

Navigate to the **Tabs** section on the left hand side of the administration control panel. This is a list of all the tabs that have been set up. Each of the tabs appears like an individual page in wordpress and all the same options are available that you would find if it was a page. You can make the tabs a draft, delete them, revert them to a previous state etc.

Creating a new Tab is similar to creating a new post or page elsewhere in wordpress.

a) To create a new Tab click the **Add New** button at the top of the page.

Alternatively you can select the add new option on the navigation on the left of the page.

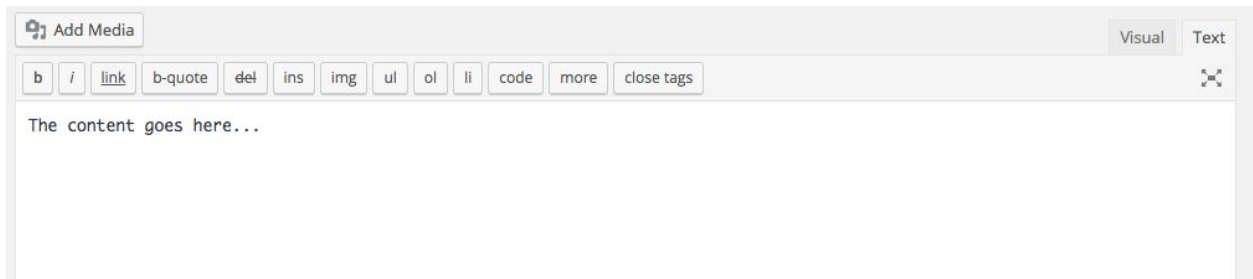

b) Add the **Title** for the Tab at the top of the page.

RED BALLOON

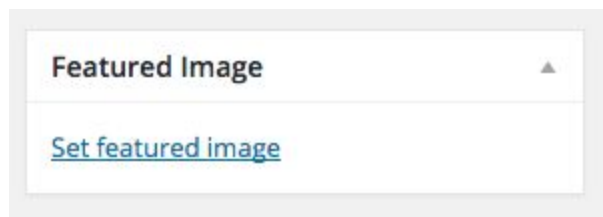

Add New Tab

Testing Tab - 3

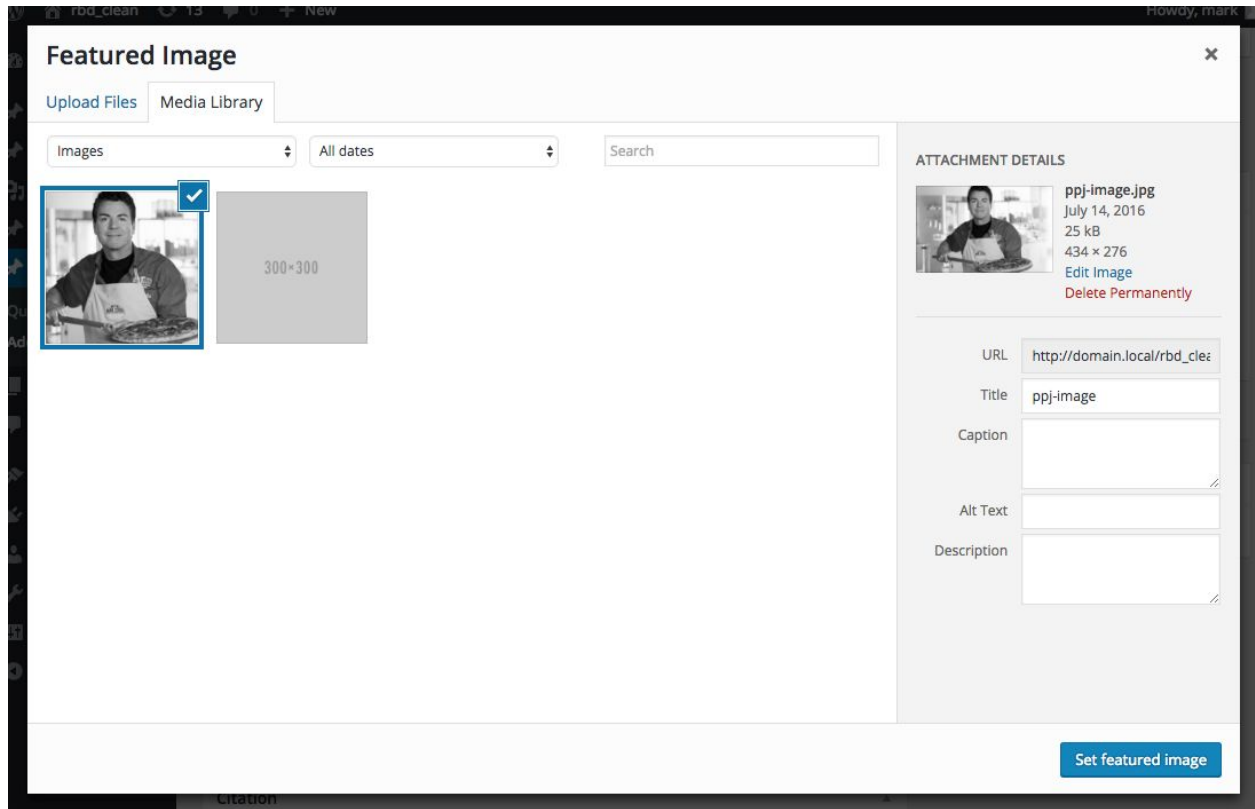

c) Add the text content for the tab to the main text edit box

c) If you want to set an image for the tab you can add it by clicking the **Set Featured Image** button on the right hand side.

Either select an image from those already uploaded or click and drag a new image into the window and select it. Then press **Set Featured Image** in the bottom right.

This will now show as the image for the Tab whenever it is included on the site.

Adding Tabs to a page

To add a tab to a page, add a tab shortcode like this:

```
[tab include="tab id, [tab id ]"]
```
